## RYAH MedTech Leveraging Data for Powerful Health Solutions

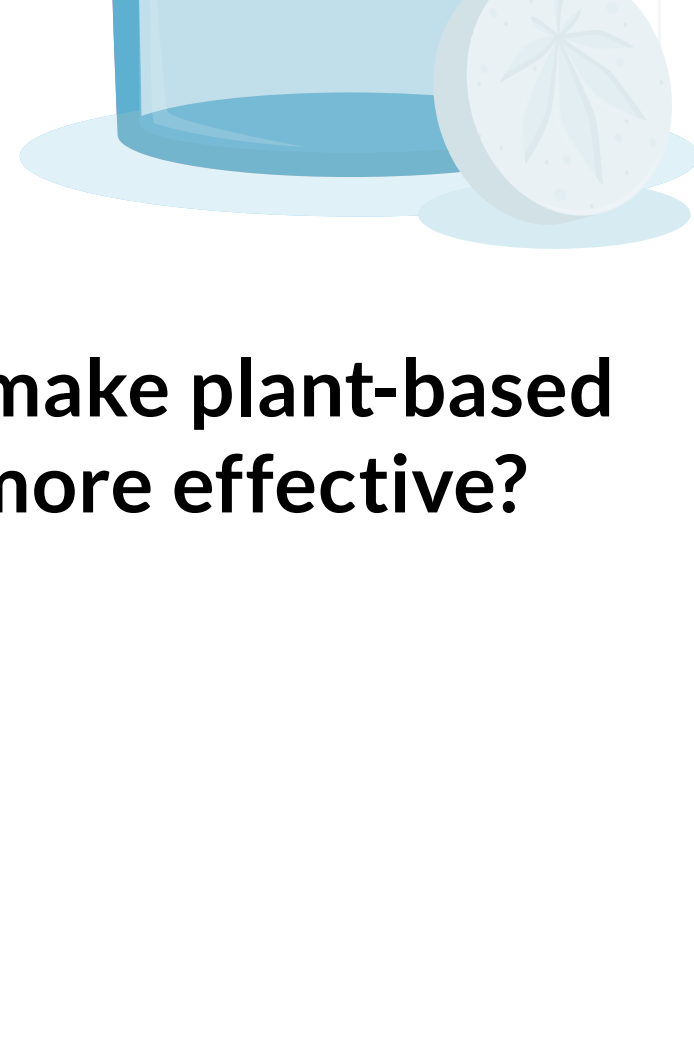

**TENS OF MILLIONS OF PEOPLE** rely on plant-based treatment—such as medical cannabis—to manage a variety of conditions.

Source: Harvard Medical School

**But several issues exist with this type of treatment:**

- Lack of accurate dosing
- Unpredictable effects
- Difficult for practitioners to track progress
- More data required by legislators to make policy changes

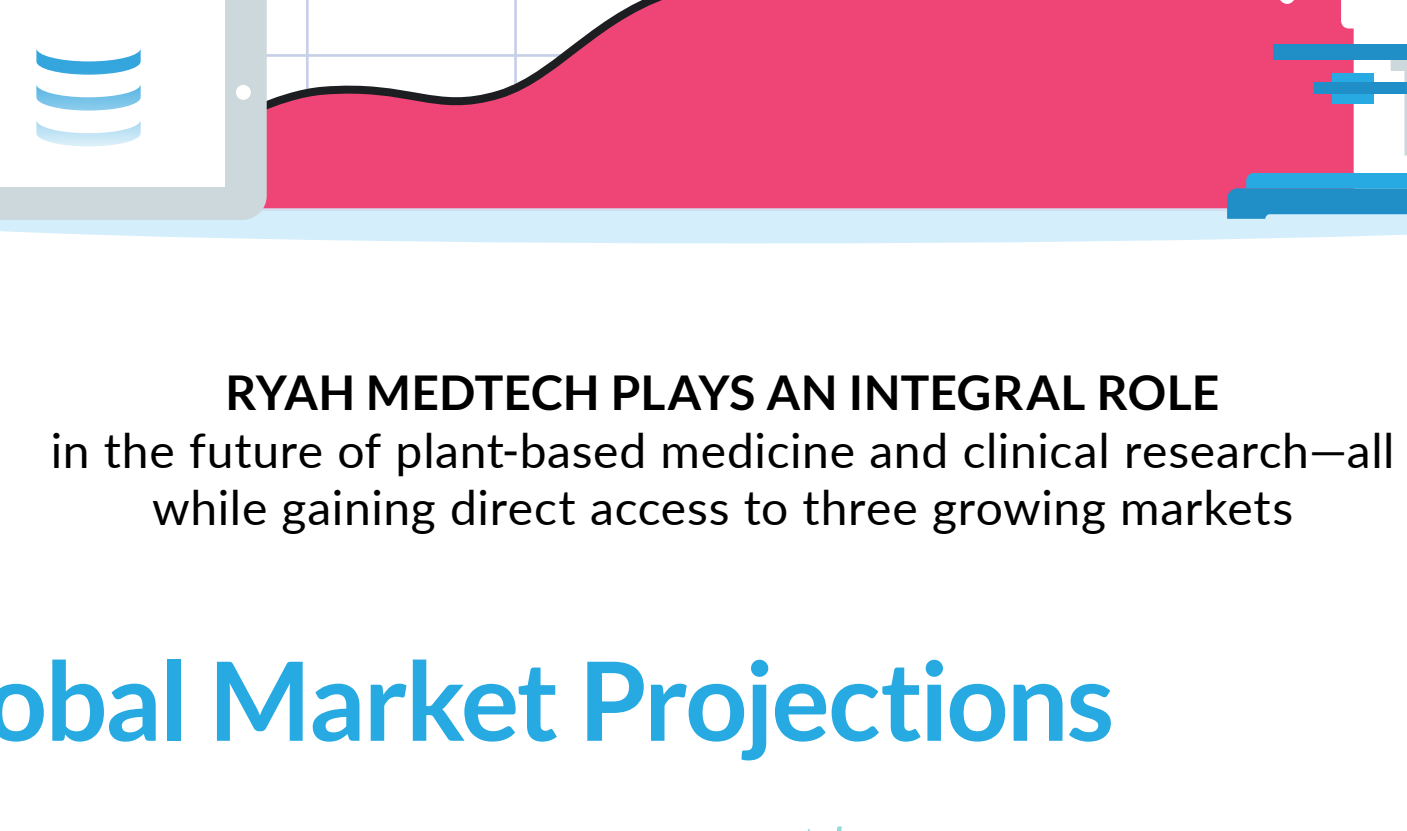

**What if there was a way to make plant-based treatment predictable and more effective? Now there is.**

### RYAH MedTech

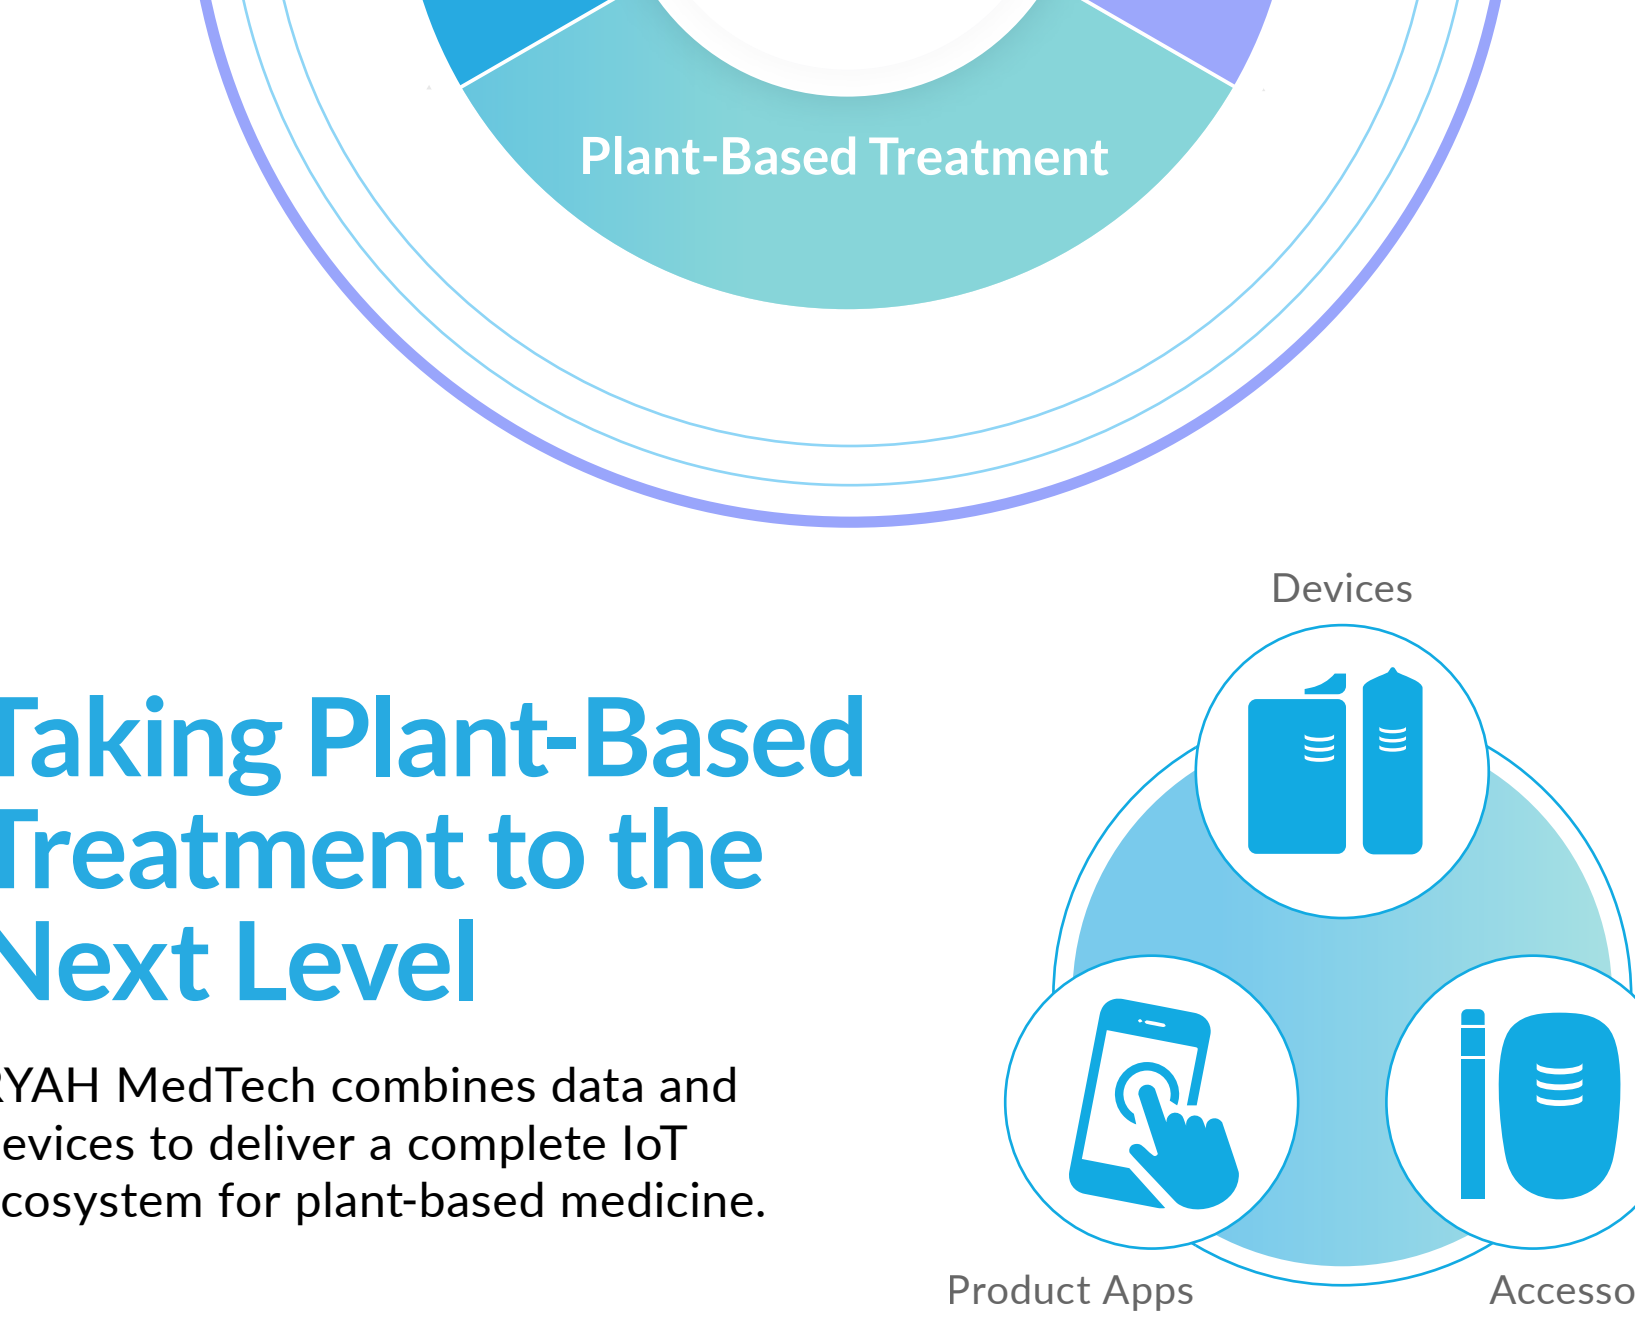

IS A TECH COMPANY THAT CLOSSES THE GAP IN MISSING DATA typically found in plant-based medicine through its suite of IoT devices and software.

Incredibly valuable anonymous user data is collected from these devices, and can then be leveraged by different partners depending on their needs.

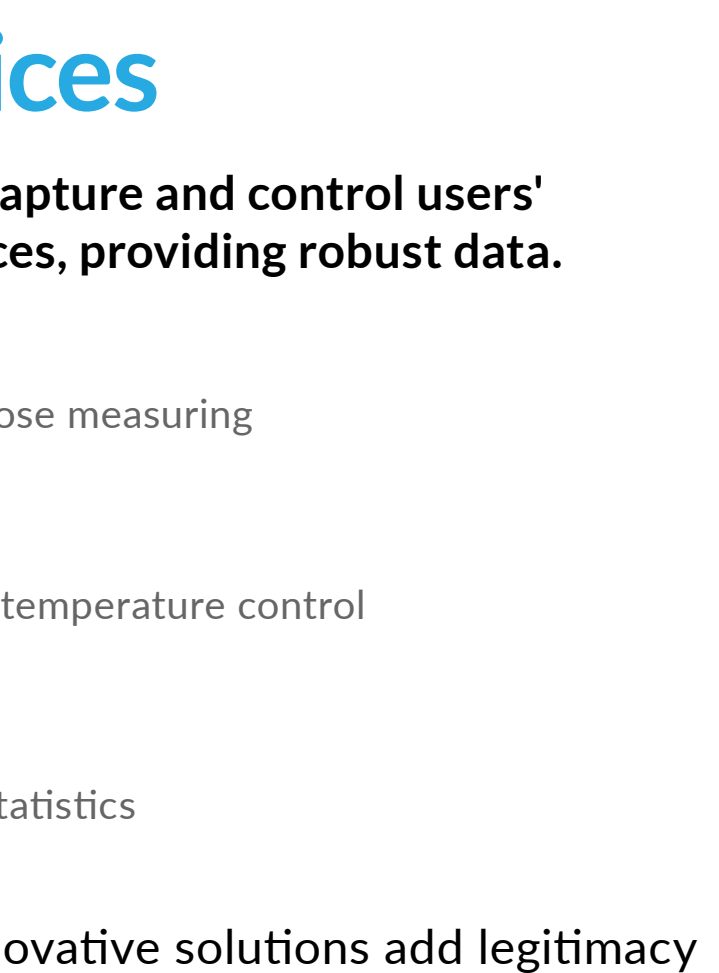

**RYAH MEDTECH PLAYS AN INTEGRAL ROLE** in the future of plant-based medicine and clinical research—all while gaining direct access to three growing markets

### Global Market Projections

### Taking Plant-Based Treatment to the Next Level

RYAH MedTech combines data and devices to deliver a complete IoT ecosystem for plant-based medicine.

### Devices

Devices capture and control users' experiences, providing robust data.

- Precise dose measuring
- Accurate temperature control
- Session statistics

These innovative solutions add legitimacy to the plant-based medicine industry.

### Formulation Accessories

Commercial grade materials designed for safety and regulatory compliance.

QR code technology

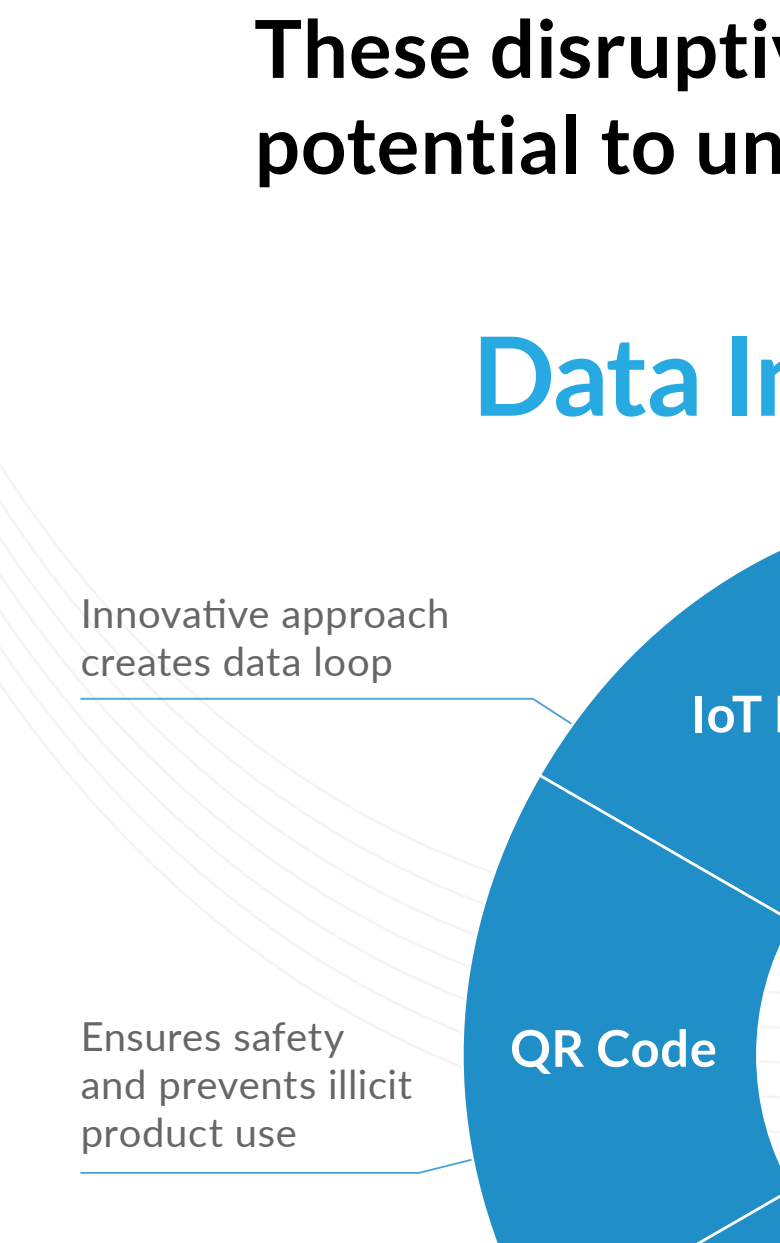

Formulation tracking mitigates illicit product use

Each delivery mechanism is envisioned to contribute usage data to the RYAH Cloud via mobile apps, also known as product apps.

### Product and Custom Apps

Dedicated platform for clinical trials.

- Ability to build custom software for specific needs
- RYAH Cloud captures data on demographics, strains, and mode of consumption
- One of the largest medical cannabis databases in the world with 310,000+ users

**These disruptive digital solutions have the potential to unlock a wealth of benefits.**

### Data Input Data Access

**WHEN SMART DEVICES, ARTIFICIAL INTELLIGENCE, AND INTEGRATED PLATFORMS WORK TOGETHER IN HARMONY,** patients and doctors can reap the rewards of plant-based medicine with safety and accuracy in mind.

### Why Invest in RYAH MedTech?

RYAH MedTech has established more partnerships, gained a better reputation, and developed bigger ambitions than competitors in the space.

**Several drivers are behind the company's success to date:**

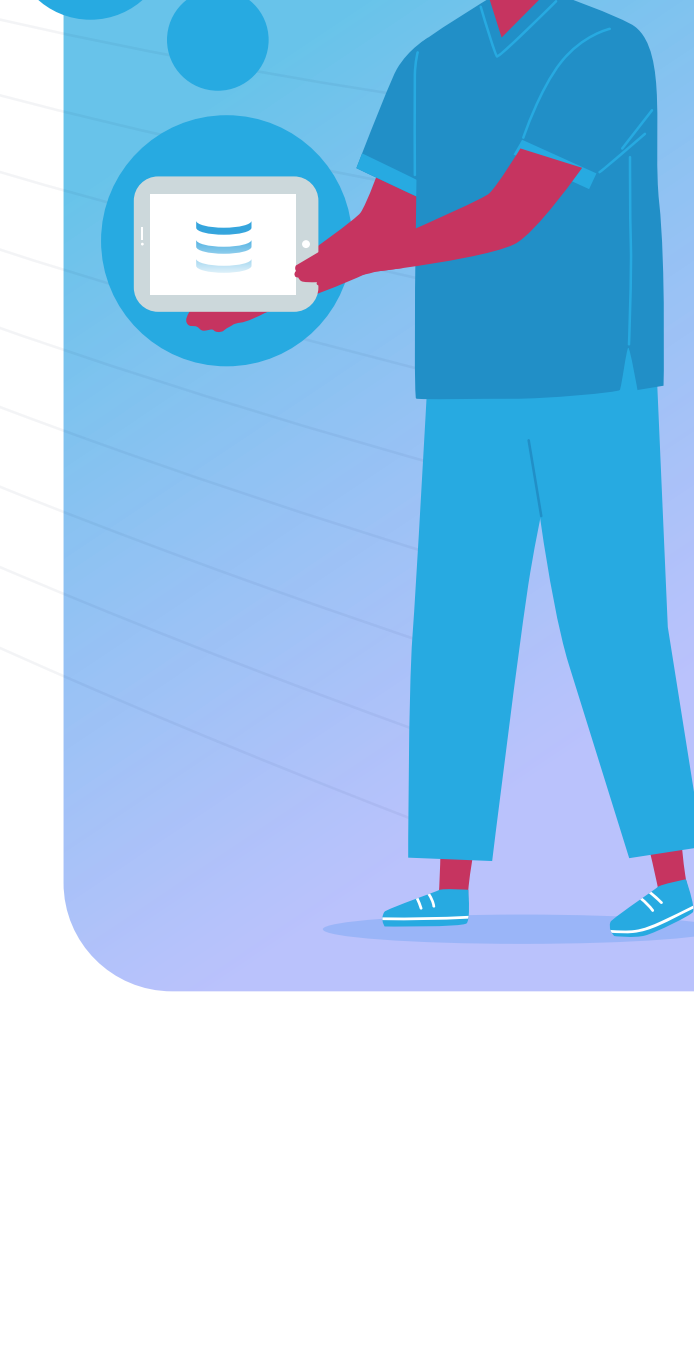

- A Growing Ecosystem of Products**  
Multiple IoT devices portfolio that have produced data for the world's largest clinical trials in plant-based medicine.
- Proprietary Technology**  
RYAH Cloud is a HIPAA-compliant storing location for ailment-relief data.
- Capacity for Custom Solutions**  
Multiple delivery mechanisms, combined with the capacity to build customer solutions for clinical trials, make RYAH MedTech a powerful engine of progress in the medical sphere.
- Unique Expertise and Data**  
Aggregation of data provides researchers with the tools that will potentially allow to develop new, life-altering therapies that would have otherwise gone undiscovered.
- Key Player in Clinical Research and Medical Data**  
The future of clinical-use heavily depends on reliable and accurate patient feedback.
- Long-Term Business Model**  
Most players in the market focus on short-term metrics such as sales, not long-term drivers like large-scale data collection.

There are also several new products in the pipeline such as RYAH MD, a patient relationship management platform that allows for tailored, and real-time treatment plans.

### A New Frontier in Healthcare

Beyond plant-based medicine, the ability to capture and analyze data has become essential for enhancing health outcomes, achieving medical advancements, and driving the healthcare industry forward.

By harnessing the power of IoT and artificial intelligence, RYAH MedTech is leading this technological revolution and reshaping the entire patient-doctor experience.
