Great Bear Resources (TSX-V: GBR) outperformed the VanEck Vectors Gold Miners ETF (GDXJ) over the past two years. The Dixie Project has the benefit of wide widths of continuous mineralization, consistent high-grade, near-surface drill results, and large geologic features that are rare and top-tier deposits are even more unique. That is why it takes a different approach to beat the odds.

**Jurisdiction High-Grade Drill**

- **May 19 LP Fault**:
  - 32.90 g/t gold over 11.00 m including 11.22 m expanding gold discoveries
