CARBONSTREAMING Corporation

Learn more at carbonstreaming.com

The concept of reducing carbon footprint is gaining momentum in the business world, especially for companies that aim to cut emissions, carbon offsets and transport that face a lengthy transition to a net-zero carbon future. Increasingly, shareholders and asset managers expect companies to reduce their carbon footprint.

Not a Matter of If, But When

With a significant pipeline of opportunities and a strong balance sheet, CSC is targeting an internal rate of return of 15%.

Market Growth

In just two years, net-zero targets of the world's largest emitters have jumped five-fold. In 2021, voluntary carbon markets exceeded US$1 billion. Hard-to-Abate Sectors for voluntary carbon credits.

Scientific and Pressures

Many of the world's GHG emissions—many of which are attributable to large emitters—have exceeded the urgency of climate goals. CSC is uniquely positioned to leverage capital markets to finance projects that bring capital to projects needed to deliver a net-zero carbon future.

Partners

CSC's portfolio includes carbon credit streams and investments that will be from these industries. CSP's growth strategy rests on the following three pillars:

1. Leverages capital markets
2. Bridging the gaps in exposure to carbon markets
3. Producing high-quality credits for buyers

CSC's first-mover advantage has quickly established itself as a trusted source for carbon offsets as companies aim to avoid reputational risk.

One metric ton of CO2e = $199M

This is an investor-led initiative that mobilizes companies to prepare feasibility studies and establish initial project activities.

Notable Projects

CSC's growth strategy rests on the following three pillars:

1. Leverages capital markets
2. Bridging the gaps in exposure to carbon markets
3. Producing high-quality credits for buyers

CSC has made an initial investment in the Bonobo Peace Forest, which will be directed to prepare feasibility studies and establish initial project activities.

Investor Pressure

A recent at Scotiabank G7 finance ministers favor mandatory disclosure of corporate climate ambitions become more urgent. Studies indicate carbon prices will need to exceed $100/t CO2eq (CO2 equivalent) in order to meet the goals of the Paris Agreement.

Carbon Markets

In 2021, voluntary carbon markets exceeded $1 billion. In 2022, voluntary carbon markets could be worth $20 billion. The need for carbon credits will be from these industries.

Net-Zero Future

CSC is uniquely positioned to leverage capital markets to finance projects that bring capital to projects needed to deliver a net-zero carbon future.
